Search Results - Record(s) 81 through 100 of 140 returned.

- 81. 6987001. 23 Feb 01; 17 Jan 06. Methods and compositions using stearoyl-CoA desaturase to identify triglyceride reducing therapeutic agents. Hayden; Michael R., et al. 435/25; 435/11 435/4 514/1 530/354. C12Q1/00 20060101 C12Q1/26 20060101 C12Q1/60 20060101 A61K31/00 20060101 A61K38/00 20060101 .
- 82. 6451313. 07 Jun 95; 17 Sep 02. CD4-gamma2 and CD4-IGG2 chimeras. Maddon; Paul J., et al. 424/185.1; 424/1.49 424/1.69 424/134.1 424/184.1 424/192.1 435/328 435/358 435/361 435/365 435/69.1 435/69.7 530/350 530/387.3. A61K038/17 C07K014/705 C12N015/00 .
- 83. 6398800. 18 Jun 01; 04 Jun 02. Method for testing a technique intended to predict onset of heart arrhythmia using an animal test subject. Chen; Peng-Sheng. 607/1; 128/898. A61N001/00 .
- 84. 6353757. 18 Jun 01; 05 Mar 02. Method for collecting data pertinent to predictors of heart arrhythmias using an animal test subject. Chen; Peng-Sheng. 607/3; 128/898 600/508. A61N001/00 .
- 85. 6351668. 07 May 99; 26 Feb 02. Method for inducing ventricular arrhythmias in an animal model system. Chen; Peng-Sheng. 607/3; 607/2. A61N001/00 .
- 86. 5646027. 08 Sep 94; 08 Jul 97. Process for the production of gelatinase catalytic domain protein. Ye; Qi-Zhuang, et al. 435/219; 435/212 435/320.1 536/23.2. C12N015/57 C12N015/63 C12P021/00 .
- 87. JP02008131939A. 29 Oct 07. 12 Jun 08. METHOD AND COMPOSITION USING STEAROYL-CoA DESATURASE TO IDENTIFY TRIGLYCERIDE-REDUCING THERAPEUTIC AGENT. BROWNLIE, ALISON J, et al. C12Q1/02; C12N15/09 C12Q1/66 G01N33/50 G01N33/15 .
- 88. WO2007130075A1. 05 Jun 06. 15 Nov 07. AMINOTHIAZOLE DERIVATIVES AS HUMAN STEAROYL-COA DESATURASE INHIBITORS. FU, JIANMIN, et al. C07D277/56;.
- 89. EP001827438A2. 20 Sep 05. 05 Sep 07. PYRIDINE DERIVATIVES FOR INHIBITING HUMAN STEAROYL-COA-DESATURASE. KAMBOJ, RAJENDER, et al. A61K031/496;.
- 90. EP001814551A2. 20 Sep 05. 08 Aug 07. PYRIDAZINE DERIVATIVES FOR INHIBITING HUMAN STEAROYL-COA-DESATURASE. KAMBOJ, RAJENDER, et al. A61K031/501;.
- 91. WO2004010927A2. 16 Jul 03. 05 Feb 04. METHOD FOR INCREASING INSULIN SENSITIVITY AND FOR TREATING AND PREVENTING TYPE 2 DIABETES. NTAMBI, JAMES M, et al. A61K00/;.
- 92. WO 2009024287 A2. New substituted benzene compounds are stearoyl-coenzyme A desaturase inhibitors, useful to prepare a medicament for treating e.g. metabolic syndrome, obesity, diabetes, pancreatitis, insulin resistance and Alzheimer diseases. HERLING A, et al.
- 93. WO 2009010560 A1. New N-((chloro-((cyclopropylmethyl)oxy)phenyl)methyl)-methyl-1H-pyrazolyl-t trahydro-isquinolinecarboxamide is stearoyl-coenzyme A desaturase inhibitor, useful to treat e.g. acne, obesity, angina, psoriasis, eczema, stroke and cancer. DAUGAN A C.
- 94. US 20080300223 A1. New (20R)-2alpha-methyl-19,26,27-trinor-vitamin D compounds useful for treating e.g. psoriasis, colon cancer, diabetes mellitus, rheumatoid arthritis, asthma and inflammatory bowel diseases. CLAGETT-DAME M, et al.
- 95. US 20080255161 A1. New 3-hydroquinazolin-4-one compound useful for treating e.g. coronary artery disease, atherosclerosis, heart disease, hypertension, and peripheral vascular disease, cancer, cerebrovascular diseases, dyslipidemia, obesity and diabetes. BOZE M, et al.

96. WO 2008127349 A2. New heterocyclic derivatives useful for treating a disease or condition mediated by stearoyl-coenzyme A desaturase e.g. metabolic syndrome such as dyslipidemia, obesity or insulin resistance. DALES N, et al.
97. US 20080249100 A1. New pteridinone derivative or its salt useful as a stearoyl-CoA desaturase enzyme inhibitor and treating disease e.g. atherosclerosis, heart disease, hypertension, cancer, diabetes. CHISHOLM J, et al.
98. US 7390813 B1. Use of pyridylpiperazine derivatives for lowering triglyceride serum levels, low-density lipoprotein serum levels, very low density lipoprotein serum levels, for treating dyslipidemia and for treating e.g. cardiovascular disease and obesity. FINE R M, et al.
99. US 20080081799 A1. New methylene-(20S,25S)-19,27-dinor-(22E)-vitamin D compounds useful to treat e.g. psoriasis, leukemia, skin cancer, rejection of organ transplants, rheumatoid arthritis, asthma, wrinkles, multiple sclerosis and renal osteodystrophy. CHIELLINI G, et al.
100. US 20080081800 A1. New 2-methylene-(20R,25S)-19,27-dinor-(22E)-vitamin D analogs useful for treating e.g. psoriasis, leukemia, diabetes mellitus, rheumatoid arthritis, asthma, and renal osteodystrophy. CHIELLINI G, et al.
